Summary

Versatile AI Engineer with experience in generative AI, NLP, time series analysis, and computer vision. Passionate about innovative approaches, I have mastered the entire project lifecycle, from prototyping to deployment. Curious, autonomous, and impact-driven, I seek to take on ambitious technical challenges.

Experience

Data scientist at company 1 (2025 - Present)

- Task 1: Created a streamlit app to help job seekers create, adapt and enhance resumes
- Task 2: Integrated LLMs in 3 sections of the app: resume adapter, resume enhancer, and resume generation
- Task 3: Created a GitHub repo for this project and made it open source
-

Tech: Python, Streamlit, LLMs, Groq

Education

Master's degree in Computer science at Engineering school (2018 - 2023)

Projects

(2025 - 2026)

- Task 1: Created a streamlit app to help job seekers create, adapt and enhance resumes
- Task 2: Integrated LLMs in 3 sections of the app: resume adapter, resume enhancer, and resume generation
- Task 3: Created a GitHub repo for this project and made it open source

Tech: Python, LLMs, Streamlit, groq

Skills

Python, R, C++, SQL, TensorFlow, PyTorch, Keras, ONNX, Hugging Face Transformers, NumPy, Pandas, Scikit-learn, OpenCV, LangChain, LangGraph, Git, FastAPI, Jira, Confluence
